DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 9, 2009 has been entered. Claims 39-41 have been added. Currently, claims 19-41 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19-41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 28 of claim 19, "the first operating means supply channel or space" lacks a proper antecedent basis. In claim 22, the intended antecedent of "the adjusting device" is unclear since first and second adjusting devices have been defined. In claim 23, the intended antecedent of "said one blade wheel" is unclear since at least one primary blade wheel and one secondary blade wheel have been defined. In claim 25, it is unclear whether "the control pressure media source" refers to the "constant or controllable pressure media source" defined in claim 22.

Art Unit: 3655

There is no proper antecedent for "the operating means supply", recited in claim 33.

Apparently this should be the operating means supply source. In claim 38, it is unclear which blade wheel is referred to by "said blade wheel".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 19-38, insofar as definite, are rejected under 35 U.S.C. 103(a) as being unpatentable over Fottinger ('461) in view of Yokoyama et al. ('999). Fottinger discloses a starting unit with an input 1 that can be coupled to a drive and an output 9 that can be coupled to a drive part. A hydrodynamic component comprises a primary turbine wheel 2 and a secondary wheel 30. An engaging and disengaging clutch is provided at 35; and, while shown as a tooth clutch, Fottinger discloses that a friction clutch can be used. Use of a friction clutch would further have been obvious from Yokoyama et al., who provide a hydraulically actuated friction clutch at 74. Fottinger also provides a means for influencing the transmission behavior comprising a part 30' that can be introduced into the working chamber and includes an adjusting device 34 for causing the introduction of the part 30' into the working chamber. The adjusting device comprises a cylinder-piston unit.

Art Unit: 3655

Response to Arguments

Applicant's arguments with respect to claims 19-41 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney H. Bonck whose telephone number is (571) 272-7089. The examiner can normally be reached on Monday-Friday 7:00AM - 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles A. Marmor can be reached on (571) 272-7095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
